

ARCHITECTURAL & LANDSCAPE STONE

OVER 60 YEARS OF QUALITY STONE AND MASONRY

NOT ALL STONE IS CREATED EQUAL™

Stone has been the building block of choice for centuries. From the ancient pyramids of Egypt to the meandering walls of Europe and China, civilizations have depended on stone because they knew it would endure.

SPECIFICATIONS

Anderson's Argillite stone surpasses the hardness of granite providing true strength and durability.

STONE TYPE	MODULUS OF RUPTURE (PSI)	FLEXURAL STRENGTH (PSI)	COMPRESSIVE STRENGTH (PSI)	ABRASION INDEX	DENSITY LB/CUFT
Chief Cliff Argillite*	3024 Avg. Psi	2496 Avg. Psi	14,547 Avg. Psi	7.32 Avg. lw	167.93 Ave Lb/CuFt

Full ASTM test data available on request. * A highly compacted sedimentary or slightly metamorphic rock consisting primarily of particles of clay or silt.

OVER 60 YEARS OF QUALITY STONE & MASONRY

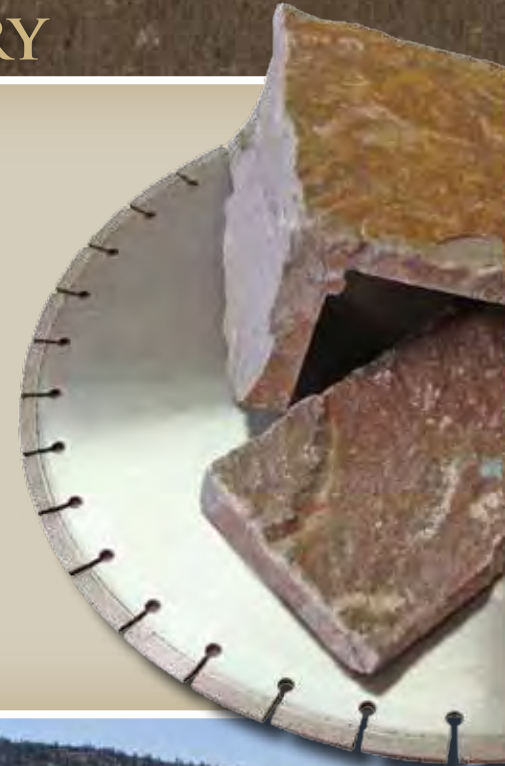

QUALITY

For more than 60 years Anderson Stone has been producing the best Montana stone products available. Today we are recognized as the premier Montana supplier of natural building, landscape and thin veneer stone products in the industry.

With 3 quarries totalling over 15 acres, we have a variety of stone readily available to enhance and add natural beauty to your project. As owners and architects are always seeking to make their

projects exemplary in every way, custom stone pieces become necessary to make this a reality. Anderson Stone has the personnel and equipment to extract or fabricate a wide variety of pieces to complete any project. Custom pieces and special order pricing available upon request.

With our unsurpassed customer service and quality stone, it's not a mystery why Anderson Stone is specified by the most discriminating architects, builders, designers, and masons.

ARCHITECTURAL & LANDSCAPE STONE

Anderson Stone recognizes the earth's resources are precious and limited. Our stone operations predominantly use "extract and split" techniques to produce vast amounts of stone from a limited amount of acreage, thus leaving more of the natural environment intact. Processing and packaging is done at the quarry, further limiting the amount of fuel, energy, and waste required for the finish products. Finally, due to the lack of abundant water at our quarries, our cutting operations recycle all of the water supplies continuously.
